

Smart cooking means cooking profitably and economically with cook-and-chill production, using Salvis GreenVAC vacuum technology. **Smart cooking** is the perfect recipe for happy hosts and guests.

Multifunctional. Efficient. Flexible.

Salvis Compactline is the cost efficient entry level into frontcooking-technology, with convincing quality and simple elegance. The easy rotary switch allows fast and energy saving operation. An eye catcher in front cooking areas, in bistros and kitchens that cook with fresh ingredients. Efficient wherever energy is required quickly.

State-of-the-art technology allows maximum convenience and operating safety.

The table-top units comes with one cooking zone and the inductions unit is available at two different power levels. Infinitely adjustable power guarantees that food of all kinds can be prepared at the right temperature. The new Salvis Compactline is an easy-to-use and highpowered cooking unit. The elegant and slim chromium-nickel steel housing is eye-catching wherever it goes. The flush 6 mm thick ceramic glass plate not only provides stability, but real safety as well. The large induction cooking zone with a diameter of 270 mm is fitted with an electronic pan detection system, so it only consumes power when the cooking surface is being used, thereby automatically reducing energy costs.
